GLOCK 26 Gen4 and GLOCK 27 Gen4

From now on also the smallest GLOCK pistols in caliber 9x19 and .40 are adaptable to the size of the user's hand and are available as Gen4 models.

The Gen4, just like any GLOCK pistol has the same time tested

- “Safe” Action” system
- Durable exterior finish
- Cold hammer forged barrel
- Durability
- Reliability
- Light weight

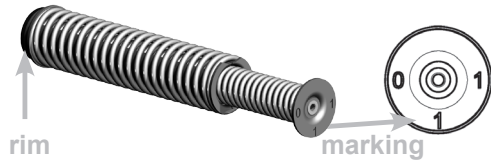

... that makes GLOCK firearms famous!

Upgrade kit for Dual Recoil Spring Assembly

In case your pistol shows problems when disassembling the recoil spring from the slide and barrel assembly we offer an upgrade kit for first series of GLOCK Gen4 standard size models having no recess (see figure) to better embed the guiding rod of the recoil spring assembly.

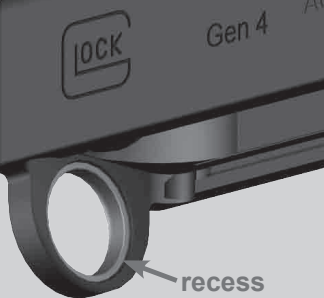

See table of corresponding recoil spring markings below to choose correct version.

Gen 4 Dual Recoil Spring Assembly

The GLOCK Gen4 pistol models were successfully adopted by the handgun users and the reports especially on the performances of the GLOCK Gen4 pistol models were enthusiastic.

In order to optimize the shooting behavior of the Gen4 models when using weak low quality ammunition the range of available Dual Recoil Springs was diversified. In case of feeding problems check your Recoil Spring and choose correct part according to the markings on the guide rod of the spring (see table).

	1) Check your slide version	2) Check your pistol model.	3) Identify your correct spring.	
Upgrade Kit	 no recess	G22 Gen4, G31 Gen4*, G37 Gen4*		Ref 8694
		G17 Gen4		Ref 8692
Gen4 Dual Recoil Springs	 recess	G22 Gen4, G31 Gen4*, G37 Gen4*		Ref 7577
		G17 Gen4		Ref 8284
		G23 Gen4, G32 Gen4*, G38 Gen4*		Ref 7815
		G19 Gen4		Ref 8703

Dual Recoil Spring Assembly for GLOCK 26 Gen4 and GLOCK 27 Gen4 is currently the same as for GLOCK 26 and GLOCK 27.

* Check model availability with your local dealer.

GLOCK Tactical Lights

Trouble Shooting

Due to the fact that several GLOCK Tactical lights were sent back for company inspection without having any defaults we may kindly remind you to first check the battery status or the bulb of the Tactical Light in case the laser does alight and the lamp does not.

Surface treatment of GLOCK metal parts

Our procedures for surface treatment vary according to the usage of the respective part. This procedure interfering with the molecular structure of the metal surface is under constant evaluation and optimization by GLOCK metallurgy team. Due to some modification of the procedure in order to optimize surface refinement and reduce ecological impact some variation of the color of the GLOCK part could occur during the last months. These possible variations of color are minimal and have no influence on the quality of the product.

Women's Perfection Bonded Fleece
